

LangChain   

Prompt Chaining

AUGMENTED STARTUPS
Fusing AI Innovation & Next-Gen Education

In LangChain, Prompt Chaining is the sequential use of Large Language Model (LLM) calls, where each **model's output feeds into the next model's input, forming a chain of processing stages.**

Bigger Picture

Prompt Chaining plays a key role in enabling **LangChain** to handle multi-stage tasks and produce detailed, context-rich responses
